

MEDISTAY HOSPITAL ACCOMODATION, KOGARAH, NSW

To turn an empty office floor into high quality accommodation is no easy task. Especially when the office space is located on the second floor of a building, with no access to traditional, gravity plumbing. To achieve 6 luxurious studio apartments, each complete with their own ensuite and kitchenette, an innovative plumbing solution was needed.

“The purpose of this area was to create accommodation for the families of hospital patients, so they could be close to their loved ones while they are in hospital. We have people staying from between 2 days to 1 week and they love the convenience.

I’ve known about Saniflo for a long time, so when I decided to create accommodation and had an issue with plumbing, Saniflo was the obvious choice.”

Jeffrey Collins,
Managing Director MediStay

At just 140mm deep, Sanipack can be positioned in areas with restricted openings, away from the toilet and is easy to service

OBJECTIVE:
Create all-inclusive accommodation for families visiting hospital patients.

CHALLENGE:
Plumbing needed in a multistorey office building.

SOLUTION:

SANIPACK SA99

SANIPACK

SA99

To create studio apartments with their own ensuite and kitchenette in a multistorey building, a macerator and/or grey water pump is needed. In these situations, it's not possible to drill core holes through to the below tenants, meaning that gravity plumbing is not an option.

"We recommended Sanipack as it's an ideal unit if the pump needs to be located away from the toilet, which we needed in this case. For Medistay, each ensuite features a toilet, basin and shower, and then there is also a kitchenette with sink. Sanipack allows all of these connections and can be installed in small spaces."

- Greg Waters, Technical Manager Saniflo Australasia.

PUMPING DISTANCE UP TO **5m**

PUMPING DISTANCE UP TO **100m**

KEY BENEFITS:

- ✓ Allows the installation of a wall hung toilet, vanity basin and shower.
- ✓ Featuring a depth of only 146mm, the Sanipack fits easily inside a small wall cavity.
- ✓ Can be fitted with a SaniAlarm.
- ✓ Pumps 5m vertically, 100m horizontally, or lesser combinations or both.

POSSIBLE CONNECTIONS

Wall hung WC, vanity basin, shower

RECOMMENDED DISCHARGE PIPE DIAMETER

20mm uPVC Pressure Pipe

NORMAL OPERATING TEMPERATURE

35°C and max 90°C for short periods

ELECTRICAL POWER SUPPLY

220-240V / 50Hz

MOTOR POWER RATING

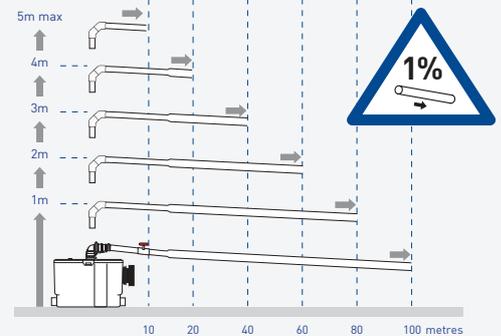

400W

OVERALL MEASUREMENTS (W X H X D)

401 x 295 x 146mm

PUMPING DISTANCE PERFORMANCE

Increase size of horizontal run by one pipe size after 5m

SANIFLO'S DESIGN SERVICE

Saniflo offers project design consultancy. We read plans, help with design layouts, and help specify pumps and locations. We go to the site, help at a design stage, and work with the hydraulic consultants and the architects to help with hydraulic design work, including the positioning of the pumps. If an architect or hydraulic consultant hasn't worked with pumps before, there's no need to worry. We offer the whole package from start to finish to help achieve the desired outcome for your clients.
