

OBJECTIVE:

To create a space with all essential amenities.

CHALLENGE:

Plumbing needed in a multistorey building on a concrete slab.

SOLUTION:

SANISPEED+

SANIACCESS 2

SANICOM 1

REGGIO EMILIA EARLY LEARNING CENTRE

When Nasser Benjamin needed a plumbing solution for his new early learning centre, Saniflo was the obvious choice. Having already used Saniflo twice, once for a commercial project, and once for his own residence, Nasser had no hesitation in using Saniflo products again.

In each instance, Nasser was faced with the issue of installing plumbing in an area located on a concrete slab. Traditional plumbing was ruled out as digging through the post-tension

post-tension concrete slab to the tenancies below was not an option. This is where Saniflo came in.

To achieve the space that Nasser wanted to create for the early learning centre, Saniflo recommended Sanispeed for the kitchenette, Sanicom for the main kitchen and Saniaccess 2 for the children's toilets.

“The first time I used Saniflo was for my first childcare centre in 2012. There, we faced the same problem; we couldn't go through the concrete slab. I spoke to my hardware guy, who recommended Saniflo, and the rest is history.”

- Nasser Benjamin, Owner.

The Sanispeed+ was discreetly installed inside the cupboard under the sink.

SANISPEED+

“The Sanispeed+ is our largest seller, our smallest commercial grey water pump and it’s used a lot for commercial office kitchens and small cafes. It handles higher temperatures than the domestic range, which is often needed in these situations.”

- Greg Waters, Technical Manager Saniflo Australasia.

KEY BENEFITS:

- ✓ Allows the installation of a dishwasher, glasswasher, washing machine, kitchen sink, shower, vanity basin, bath and coffee station in areas without plumbing access.
- ✓ The smallest commercial grey water pump provides the perfect solution for a low to medium use commercial kitchen, office, café or bar.
- ✓ Ability to handle a higher temperature than other domestic pumps.
- ✓ Pumps 7m vertically, 90m horizontally, or lesser combinations or both.

SANIACCESS 2

“The beauty of the Saniaccess 2 macerator pump is the ease of access for serviceability. The access is via panels on top of the unit, which give you direct access to the blades and the electrical chamber. It’s ideal for childcare centres, commercial applications, or anywhere where blockages are a potential.”

- Greg Waters, Technical Manager Saniflo Australasia.

KEY BENEFITS:

- ✓ Macerator pump with the possibility to connect a WC and vanity basin.
- ✓ Provides easy access to the blades and electrical chamber for servicing.
- ✓ Pumps up to 5m vertically, 100m horizontally, or lesser combinations of both.

The Saniaccess 2 was installed behind the existing wall to minimise visibility of the pump.

SANICOM 1

“The Sanicom 1 was chosen for the kitchen because of its ability to handle higher volumes of incoming waste, higher temperatures along with greasy waste.”

- Greg Waters, Technical Manager Saniflo Australasia.

KEY BENEFITS:

- ✓ This mid-sized commercial grey water pump is designed to handle higher temperatures and a higher flow rate.
- ✓ Temperatures between 35°C and 90°C can be accepted.
- ✓ Pumps up to 8m vertically, 100m horizontally, or lesser combinations of both.

ABOUT SANIFLO

Saniflo is a brand created and owned by the French owned SFA Group . For over 60 years the SFA Group's goal has been to allow one to easily install toilets, showers, sinks, kitchens, baths and hand basins literally anywhere. From its early beginnings as the inventor of the domestic macerating system, the SFA Group is today amongst the main companies providing pump solutions worldwide. Synonymous with quality and technical expertise, Saniflo's made in France products comply with the strictest quality requirements and consistently meet customer expectations. Saniflo products all have Australian Watermark approval and their pumps are intended to be installed by licensed plumbers.

SANIFLO'S DESIGN SERVICE

Saniflo offers project consultancy and assists architects and hydraulic consultants by reviewing plans, assisting with design layouts and recommending the correct pumps and their ideal location. We even work with the plumber onsite during installation to ensure that everything goes as planned. Saniflo has a wide selection of products for domestic and commercial application to provide design flexibility.
