

OBJECTIVE:

To convert a garden shed into a functional pool changing and powder room.

CHALLENGE:

No access to nearby drainage.

SOLUTION:

SANIACCESS 2

AN UNUSED SHED BECOMES A RESOURCEFUL OUTDOOR POWDER ROOM

Outdoor living is a big part of the New Zealand summers; where coming together with family and friends for a barbecue and splash in the pool is one of lives simple pleasures. This is the ideal summer for Alex Breingan and his family. Their outdoor area is a homeowners dream, featuring a large swimming pool, hot tub and shaded alfresco area, however, there is one particular nuisance – wet and muddy feet in the house after a day of pool lounging.

Their journey was captured on the popular New Zealand TV show – 100 days of renovation.

Alex had the idea to convert the old garden shed at the back of the house into a powder and changing room. When he was advised that the excavation and installation of drainage would cost over \$20,000, his vision for the outdoor space was compromised, that is, until he sought a second opinion from his plumber.

“We love entertaining our family and friends in the summertime; the kids love to swim in the pool all day, however we don’t enjoy cleaning the mess of wet towels and muddy footprints all over the house.”

- Alex Breingan, Home Owner.

“My plumber had advised that Saniflo offered a cost-effective solution, which did not require any excavation. I was thrilled to hear that the changing and powder room was back on the agenda and achievable at a fraction of the cost.”

- Alex Breingan, Home Owner.

SANIACCESS 2

The Saniaccess 2 was installed behind the wall studs, for a sleek finish and to maximise the space. The pump connects a toilet and vanity basin, which pushes the waste out to a 20mm pipe that runs along the outside fence and connects to the main sewage. The pump is the ideal solution for the space as it is compact, quiet and enables the convenient maintenance of the unit without having to disassemble the device or empty the tank.

“Without Saniflo, we were not able to achieve the outdoor changing and powder room as it would have been too expensive. The space was used all summer long and kept the dirt outside the house!”

- Alex Breingan, Home Owner.

KEY BENEFITS:

- ✓ Macerator pump with the possibility to connect a toilet and vanity basin.
- ✓ Provides easy access to the blades and electrical chamber for servicing.
- ✓ Pumps up to 5m vertically, 100m horizontally, or lesser combinations of both.

ABOUT SANIFLO

Saniflo is a brand created and owned by the French owned SFA Group . For over 60 years the SFA Group's goal has been to allow one to easily install toilets, showers, sinks, kitchens, baths and hand basins literally anywhere. From its early beginnings as the inventor of the domestic macerating system, the SFA Group is today amongst the main companies providing pump solutions worldwide. Synonymous with quality and technical expertise, Saniflo's made in France products comply with the strictest quality requirements and consistently meet customer expectations. Saniflo products all have Australian Watermark approval and their pumps are intended to be installed by licensed plumbers.

SANIFLO'S DESIGN SERVICE

Saniflo offers project consultancy and assists architects and hydraulic consultants by reviewing plans, assisting with design layouts and recommending the correct pumps and their ideal location. We even work with the plumber onsite during installation to ensure that everything goes as planned. Saniflo has a wide selection of products for domestic and commercial application to provide design flexibility.
