

OBJECTIVE:

To offer ease of installation of smoothie machines instore nationally.

CHALLENGE:

Lack of traditional gravity drainage connections where required.

SOLUTION:

SANISPEED+ COMMERCIAL GREY WATER PUMP & 7-ELEVEN NATIONAL SMOOTHIE MACHINE ROLL OUT

Saniflo SFA Australia has been working with 7-Eleven nationally since 2013 to offer pumping solutions for their coffee and slurpy machines where conventional gravity drainage is not possible.

In addition to their successful self-serve automatic coffee and slurpy machines 7-Eleven are rolling out an Australian, first self-serve smoothie & frappe machines. This amazing dispenser makes fruit smoothies, frappes, lemonades and shakes.

This self-serve technology requires constant cleaning and rinsing as part of it's automated processes. Thankfully for 7-Eleven, the proven track record of the Sanispeed+ commercial greywater pump from Saniflo SFA has made this possible.

"The plumbing contractor for this particular project had no access to a conventional drainage point where the store owner wanted to locate the smoothie machine. After a site visit, and consultation with the plumber, the best solution could only be the Sanispeed+ — positioned in a convenient location behind the smoothie machine."

- Adam Rowe, BDM Saniflo SFA Australia

SANISPEED+

SANISPEED+

Sanispeed+ is Saniflo SFA's smallest commercial grey water pump. Its compact size allows ease of installation in small spaces, all without compromising performance.

Sanispeed+ is ideal for situations such as the 7-Eleven smoothie machine project as it has allowed for the machines to be positioned anywhere in existing stores and petrol forecourts, without the need to cut up the floor and disrupt trading.

“With the utilities of each 7-Eleven location following different layouts, design flexibility for the smoothie machine rollout was a must. Downtime for businesses due to major structural alterations was also a concern that the Sanispeed bypassed. Due to its small footprint, and ample pumping performance, the Sanispeed+ was a perfect fit for this project.”

- Greg Waters, Technical and Project Development Manager

Through a mixture of on-site and remote consultation, Saniflo SFA was able to help ensure 7-Eleven got their desired results. Despite a demanding application, the Sanispeed+'s adaptability and reliability has made this nationwide 7-Eleven project a reality.

ABOUT SANIFLO

Saniflo is a brand created and owned by the French owned SFA Group. For over 60 years the SFA Group's goal has been to allow one to easily install toilets, showers, sinks, kitchens, baths and hand basins literally anywhere. From its early beginnings as the inventor of the domestic macerating system, the SFA Group is today amongst the main companies providing pump solutions worldwide. Synonymous with quality and technical expertise, Saniflo's made in France products comply with the strictest quality requirements and consistently meet customer expectations. Saniflo products all have Australian Watermark approval and their pumps are intended to be installed by licensed plumbers.

SANIFLO'S DESIGN SERVICE

Saniflo offers project consultancy and assists architects and hydraulic consultants by reviewing plans, assisting with design layouts and recommending the correct pumps and their ideal location. We even work with the plumber onsite during installation to ensure that everything goes as planned. Saniflo has a wide selection of products for domestic and commercial application to provide design flexibility.
