

OBJECTIVE:

Relocate kitchen to discreet corner room.

CHALLENGE:

Strict heritage building plumbing restrictions.

SOLUTION:

**SANIVITE+ GREY
WATER PUMP**

INNOVATIVE PLUMBING SOLUTION CREATES A BETTER SPACE FOR LIVING

When Maurice and Margaret Watson downsized from a large family home, they compromised space for one of Sydney's finest views but the couple didn't want to compromise on their dream layout. The central living area previously featured an open plan kitchen but as Margaret said,

"I wanted to move the kitchen from the main living area to a room in the corner of the apartment".

Being located in a heritage listed building, the project had its challenges.

The heritage regulations specified that the original plumbing couldn't be relocated or extended. There was no way for the renovation to proceed using conventional plumbing.

To get around this, a compact Sanivite+ grey water unit was installed inside a cabinet in the corner of the room. This enabled the installation of a sink and dishwasher, transforming the room into a kitchen and opening up the main living area.

"I couldn't have my kitchen where I have it now without Saniflo. It has changed the whole dynamic of the apartment".

- Margaret Watson, Point Piper.

The Sanipack was used to install an ensuite off the main bedroom and a powder room next to the main living area.

KEY BENEFITS:

- ✓ Non-invasive plumbing complies with heritage building restrictions.
- ✓ Enables the installation of a sink, dishwasher, washing machine, shower or bath in rooms without plumbing access.
- ✓ Heavy-duty pump pushes waste water up to 5m upward or 50m horizontally to mains.
- ✓ Compact design for tight spaces.

“Once we moved the kitchen we were so much happier; there’s a better flow throughout the apartment, it’s lighter and brighter” said Margaret.

Saniflo also made it possible to specify the location of the kitchen sink without being limited to existing sewer connections. This enabled the owners to open up the space with a superb view onto the harbour.

“We now have the view even when we are washing the dishes. The new layout has enriched our everyday life”.

- Margaret Watson, Point Piper.

Saniflo pumps had already created new possibilities within the apartment. As Margaret explained, *“The ensuite off the main bedroom and powder room next to the main living area would not have been possible without Saniflo”.*

Now a dream kitchen area is also a reality.

ABOUT SANIFLO

Saniflo is a brand created and owned by the French owned SFA Group. For over 60 years the SFA Group's goal has been to allow one to easily install toilets, showers, sinks, kitchens, baths and hand basins literally anywhere. From its early beginnings as the inventor of the domestic macerating system, the SFA Group is today amongst the main companies providing pump solutions worldwide. Synonymous with quality and technical expertise, Saniflo's made in France products comply with the strictest quality requirements and consistently meet customer expectations. Saniflo products all have Australian Watermark approval and their pumps are intended to be installed by licensed plumbers.

SANIFLO'S DESIGN SERVICE

Saniflo offers project consultancy and assists architects and hydraulic consultants by reviewing plans, assisting with design layouts and recommending the correct pumps and their ideal location. We even work with the plumber onsite during installation to ensure that everything goes as planned. Saniflo has a wide selection of products for domestic and commercial application to provide design flexibility.
