

OBJECTIVE:

Create all-inclusive accommodation for families visiting hospital patients.

CHALLENGE:

Plumbing needed in a multistorey office building.

SOLUTION:

At just 140mm deep, Sanipack Pro Up can be positioned in areas with restricted openings, away from the toilet and is easy to service.

MEDISTAY HOSPITAL ACCOMMODATION, KOGARAH, NSW

To turn an empty office floor into high quality accommodation is no easy task. Especially when the office space is located on the second floor of a building, with no access to traditional, gravity plumbing. To achieve 6 luxurious studio apartments each complete with their own en-suite and kitchenette, an innovative plumbing solution was needed.

“The purpose of this area was to create accommodation for the families of hospital patients, so they could be close to their loved ones while they are in hospital. We have people staying from between 2 days to 1 week and they love the convenience.

I’ve known about Saniflo for a long time, so when I decided to create accommodation and had an issue with plumbing, Saniflo was the obvious choice.

- Jeffrey Collins, Managing Director MediStay.

SANIPACK PRO UP

SANIPACK PRO UP

To create studio apartments with their own ensuite and kitchenette in a multistorey building, a macerator and/or grey water pump is needed. In these situations, it's not possible to drill core holes through to the below tenants, meaning that gravity plumbing is not an option.

“We recommended Sanipack Pro Up as it’s an ideal unit if the pump needs to be located away from the toilet, which we needed in this case. For Medistay, each ensuite features a toilet, basin and shower, plus a kitchenette with a sink. Sanipack Pro Up allows all of these connections and can be installed in small spaces.”

- Greg Waters, Technical Manager Saniflo Australasia.

KEY BENEFITS:

- ✓ Allows the installation of a wall hung toilet, vanity basin and shower.
- ✓ Featuring a depth of only 146mm, the Sanipack Pro Up fits easily inside a small wall cavity.
- ✓ Can be fitted with a SaniAlarm.
- ✓ Pumps 5m vertically, 100m horizontally, or lesser combinations or both.

ABOUT SANIFLO

Saniflo is a brand created and owned by the French owned SFA Group . For over 60 years the SFA Group's goal has been to allow one to easily install toilets, showers, sinks, kitchens, baths and hand basins literally anywhere. From its early beginnings as the inventor of the domestic macerating system, the SFA Group is today amongst the main companies providing pump solutions worldwide. Synonymous with quality and technical expertise, Saniflo's made in France products comply with the strictest quality requirements and consistently meet customer expectations. Saniflo products all have Australian Watermark approval and their pumps are intended to be installed by licensed plumbers.

SANIFLO'S DESIGN SERVICE

Saniflo offers project consultancy and assists architects and hydraulic consultants by reviewing plans, assisting with design layouts and recommending the correct pumps and their ideal location. We even work with the plumber onsite during installation to ensure that everything goes as planned. Saniflo has a wide selection of products for domestic and commercial application to provide design flexibility.
