

OBJECTIVE:

Provide plumbing for office kitchenettes where gravity plumbing was not available.

CHALLENGE:

The office refit had to be completed with minimal disruption to adjacent tenancies.

SOLUTION:

SANIFAST PROVIDES SOLUTION FOR OFFICE KITCHENETTES WHERE TRADITIONAL PLUMBING CANNOT

In the heart of Auckland's CBD 3 tenancies at 34 Short street required new fit outs. Each fit out required new office kitchenettes.

The work had to be completed with absolute minimal disruption to adjacent tenancies, meaning could be no noise, dust or water loss to amenities. Since alterations to the existing gravity plumbing were not an option, a unique solution was needed.

After consulting Saniflo SFA, the contractors were specified the Sanifast.

The Sanifast provided the perfect pumpign solution where gravity plumbing was not available

"The Sanifast greywater pump has been designed for busy office kitchenette's and with its easy plug and play connectivity to a Sani Interlock alarm system, is an ideal plumbing solution for this inner-city office project, to provide the necessary peace of mind against potential flooding."

- Graham Denysschen SFA New Zealand - National Business Development Manager

SANIFAST & SANIALARM INTERLOCK

SANIFAST

The Sanifast is a powerful and compact greywater pump which is ideal for domestic and light commercial usages. The unit is designed to receive and pump away waste water from a washing machine, dishwasher or sink, making it ideal for busy office kitchens.

It uses small internal float switches to detect wastewater levels, which it then pumps up to 10m vertically. The easy to service pump ensures businesses can operate with minimal disruption. Additionally, the Sanifast can be connected to the Sanialarm interlock for peace of mind.

Saniflo SFA grey water pumps allow sanitary fixtures to be installed in areas where access to waste water pipes and conventional gravity drainage is limited, increasing the design possibilities for installing additional facilities in existing buildings.

KEY BENEFITS:

- ✓ Plug and Play connectivity to optional external Sanialarm Interlock for water and power isolation
- ✓ Built in high level alarm
- ✓ Integrated carbon filter and anti flood valve
- ✓ Ease of service design with no pipework connections on lid to hinder removal

SANIALARM INTERLOCK

The Sanialarm Interlock is an intuitive device that has 3 functions, whereby it sets off an audible alarm in the event of a high level issue and simultaneously shuts off incoming water supply to prevent flooding, whilst also cutting the power supply to the connected devices such as dishwashers or washing machines.

The optional Sanialarm Interlock

ABOUT SANIFLO

Saniflo is a brand created and owned by the French owned SFA Group. For over 60 years the SFA Group's goal has been to allow one to easily install toilets, showers, sinks, kitchens, baths and hand basins literally anywhere. From its early beginnings as the inventor of the domestic macerating system, the SFA Group is today amongst the main companies providing pump solutions worldwide. Synonymous with quality and technical expertise, Saniflo's made in France products comply with the strictest quality requirements and consistently meet customer expectations. Saniflo products all have Australian Watermark approval and their pumps are intended to be installed by licensed plumbers.

SANIFLO'S DESIGN SERVICE

Saniflo offers project consultancy and assists architects and hydraulic consultants by reviewing plans, assisting with design layouts and recommending the correct pumps and their ideal location. We even work with the plumber onsite during installation to ensure that everything goes as planned. Saniflo has a wide selection of products for domestic and commercial application to provide design flexibility.
